

GOOD CHEMISTRY

MAY 1–2, 2019
HILTON LAC-LEAMY
GATINEAU-OTTAWA

CHEMISTRY INDUSTRY
ASSOCIATION OF CANADA

Responsible Care®
Our commitment to sustainability.

PLENARY AND BREAKOUT SESSIONS

Join us for the premiere conference for those in the Canadian chemistry industry and its extended value chain, featuring interactive presentations, breakout sessions, international speakers and networking opportunities. Over two days, experts in business, safety and sustainability will discuss the compelling issues the chemistry sector is facing today, and share lessons learned about living the ethic and principles of Responsible Care®...that's good chemistry.

CHEMISTRY'S **Re**PUTATION: PROTECTING, PRESERVING AND ENHANCING OUR PRECIOUS ASSET

Yohan Guntzberg of CIRANO will explore public perception of the chemistry sector while Debra Phillips of American Chemistry Council will look at how chemical producers can stay on top of current trends and meeting society's changing needs.

DIVERSITY AND INCLUSION: CHANGING CULTURE TO ATTRACT AND RETAIN THE BEST **Ta**LENT

Diversity in the workplace has numerous benefits, but many companies still struggle to be fully inclusive. Learn how other companies are investing in this important concept as well as best practices for effective collaboration with First Nations communities.

CEO PANEL: HOW CHEMISTRY ENABLES THE **C**IRCULAR ECONOMY

CIAC CEOs will highlight growing opportunities related to product stewardship, plastics in the environment and the green economy.

EXCELLENCE IN **Co**MMUNITY ENGAGEMENT: LEARNING FROM BEST PRACTICES

Learn how to best achieve excellence in community engagement from community organizations themselves. Members of Canadian community awareness organizations, community advisory panels and an ENGO will share their insights.

THE IMPORTANCE OF STRONG LEADERSHIP IN RESPONSIBLE **Ca**RE

CIAC's Regional Director for Quebec, Yves Hamelin, will discuss the vital influence member-company leaders have in meeting the requirements and spirit of Responsible Care.

AN **I**NTERNATIONAL LENS ON RESPONSIBLE CARE

International Council of Chemical Associations (ICCA) steering committee members will discuss trends in Responsible Care from around the world, partnerships with the United Nations Environment Program and other important topics.

PREVENTING CATASTROPHIC EVENTS: LEARNING FROM THE EXPERTS

Experts from high-risk and high-stress sectors such as nuclear, air traffic control and flight training will discuss how they train their personnel to prevent and mitigate unforeseen and potentially catastrophic incidents.

MEETING FUTURE NEEDS: OPPORTUNITIES FOR THE CANADIAN INDUSTRY

An economist and a media expert will discuss the products and investments the Canadian chemistry sector will need to make to meet society's needs in the future.

WORKING WITH CHEMISTRY'S CUSTOMERS TOWARDS GREATER SUSTAINABILITY

Sustainability experts from leading consumer goods companies will highlight the importance of understanding evolving consumer needs and how these lessons can be applied to the chemistry sector.

THE FUTURE OF TRANSPORT: AUTONOMOUS VEHICLES

We will explore the future of autonomous vehicles, driver-assisted transport in the chemistry sector and their role in the safe transport of chemicals.

REDUCING YOUR OPERATION'S ENVIRONMENTAL FOOTPRINT

In this session, our expert will provide best practices for reducing your operational environmental footprint and costs through energy and waste audits.

STAYING ALERT AND MONITORING FATIGUE

We will explore how to help employees stay alert by monitoring fatigue, reducing distractions and recognizing the signs of impairment.
